Förord

Detta dokument beskriver IT-arkitekturen (Software Architecture Description) samt de funktioner (användningsfallsmodell) som tjänsteproducenter för FMB och HoSp består av.

Dokumentet riktar sig främst till teknisk personal såsom: IT-arkitekter, utvecklare och driftspersonal.

Dokumentet är avsett att användas som stöd och referens vid IT-förvaltning av ovan tjänsteproducenter.

Pilarnas riktning visar vilken part som initierar given kommunikation, inte i vilken riktning nättrafiken sedan strömmar, då denna så gott som alltid är dubbelriktad.
Den port där pilen startar initierar alltid given kommunikation.
